

Product Capability Matrix

Version: 3.2 • **Owner:** Product Management • **Last reviewed:** September 2026 • **Audience:** Sales & Solutions Engineering

CAPABILITY	STATUS	DESCRIPTION
Work Intake / Triage	GA	Teams can capture, classify, prioritize, assign, and route incoming work from any channel into one consistent front door.
Cycles / Sprint Planning	GA	Teams can organize approved work into time-boxed cycles, preserve originating context, and track progress against capacity.
Pages / Product Documentation	GA	Teams can create product and technical documentation and link it directly to the execution work it describes.
Jira Import	GA	Existing issues and historical backlog items can be imported from Jira.
Enterprise SSO	GA	Enterprise plans support SSO configuration, including Okta, for production environments.
Advanced Capacity Planning	BETA	Per-engineer capacity calculations and load forecasting are available in controlled beta.
SAP Integration	ROADMAP	Native SAP integration is not currently generally available. Company-level systems-consolidation use cases are not yet supported. Target: Q1 2027
Oracle Fusion	UNSUPPORTED	Native Oracle Fusion integration is not currently supported and is not planned.
